

ROHIT PATHAK

Technical Program Manager - AI Solutions | Customer-Embedded Delivery

Abu Dhabi, UAE | +971 567874381 | pathak.a.rohit@gmail.com | Golden Visa Holder | www.rohitpathak.com

SUMMARY

12+ years in enterprise software working directly with Fortune 500 global accounts in the US. Hands-on AI engineering: agentic systems, RAG, Azure. Turns ambiguous business needs into production-grade solutions. Fluent in frontier AI.

INDEPENDENT AI BUILDS

Designed, engineered, and deployed solo end to end, from problem framing to live product.

AutoSignal — Grounded Vehicle Research from NHTSA Data + TSB PDFs | <https://www.rohitpathak.com/autosignal>

Natural-language agent built on public NHTSA data that helps buyers and DIY owners research a year/make/model, grounded in recalls, complaints, investigations, and manufacturer TSBs instead of generic web advice.

Stack: Python, FastAPI, OpenAI, Gemini PDF extraction, NHTSA ETL (DuckDB → Postgres/Supabase), extract cache by bulletin ID, Railway, Expo (React Native), Vite/React.

Subsurface AI Agent - Agentic RAG on Oil & Gas Field Data | rohitpathak.com/geo-agentic-int

Live AI assistant for Equinor's open Volve field: 7 wells, 9 years of production history, drilling and completion reports. Engineers ask plain-language questions and get cited answers grounded in field data. Replaces hours of hunting across spreadsheets and long PDF reports.

Stack: Python, LangGraph ReAct agent, OpenAI, FAISS + BM25 hybrid retrieval, LlamaParse, FastAPI, React

Structra - Vision-LLM Defect Detection | [TestFlight](#)

Mobile inspection app for property handovers. AI detects and grades construction defects, annotates photos, and compiles a defect register a developer can act on. Confidence gating keeps false positives out of the report.

Stack: Gemini 3.6 Flash, structured JSON prompting, confidence-gated outputs (≥80%), bounding-box localization, React Native (Expo), Node.js, Supabase, PDFKit

EXPERIENCE

Hexagon AB | Enterprise Digital Platforms & SaaS **Hyderabad, India**

Senior Product Manager | Jan 2023 – Dec 2025 **Product Manager** | Sep 2018 – Dec 2022

- Founded customer advisory board; ran executive AI-roadmap workshops with Fortune 500 decision makers.
- Built the product function from scratch: strategy, roadmap, prioritization, delivery processes. Shipped v1 on schedule.
- Built LLM agentic copilots (Semantic Kernel) for 3D engineering workflows. 3x faster execution.
- Shipped AI agents for NL queries on engineering databases. Retrieval cut from days to hours.
- Defined safe-agent guardrails: allow-listed APIs, RBAC, audit trails, human review.
- Led platform modernization: 64-bit .NET, multi-tenant cloud, GenAI integration.
- Retained top revenue accounts; won 2–3 majors from the primary competitor.
- Evangelized via rapid demo-feedback cycles; fed insights into roadmap. Won "Voice of the Customer" award.

Hexagon AB | Enterprise Digital Platforms & SaaS **Huntsville, AL, US**

Support Analyst → Product Manager | Sep 2013 – Sep 2018

- Embedded with customers on multi-billion-dollar infrastructure programs: gathered requirements, built solutions, delivered.
- Built SDK automation scripts. Upto 80% reduction in repetitive engineering work.
- Triaged complex platform issues with engineering. Accelerated release cycles.

CERTIFICATIONS

Certified Scrum Product Owner – Scrum Alliance • LangChain for LLM App Development – DeepLearning.AI • Multi AI Agent Systems – DeepLearning.AI

COMPETENCIES

AI Engineering: Semantic Kernel • Agentic Systems & RAG • Azure OpenAI & Azure PaaS • LangChain / LangGraph • Vision LLMs

Delivery: Customer-Embedded Execution • Requirements-to-Solution • Production Guardrails & Responsible AI • Telemetry & ROI

Stakeholders: Executive Workshops & Discovery • Account Retention & Growth • Technical Evangelism • GTM Enablement

EDUCATION

Master of Science | North Carolina State University, NC, US

Bachelor of Technology | National Institute of Technology Rourkela, India
